ISOLS Orthopedic Oncology Webinar Series

**September 16, 2025 6:00am
CST**

www.isols.com

Moderator

 Krista A Goulding, MD,
MPH

 Ginger Holt, MD

Co- Sponsored by the MSTS

Chair, Education Committee

 ValeraeO. Lewis, MD

Topic: Endoprosthesis fixation: The Press-Fit Promise or the Cemented Certainty? A case based discussion.

 **Alexandra K. Callan, MD**

Associate Professor, Residency Program Director
UT Southwestern Medical Center
Dallas TX, USA

 **Cara Cipriano, MD, MSc**

Vice Chair of Education
Associate Professor, University of Pennsylvania
Pennsylvania, PA, USA

 **Rosanna Wustrack, MD**

Professor, Clinical Orthopedic Surgery
University of California in San Francisco
San Francisco CA, USA

With the arsenal of options available to the orthopedic oncologist, what fixation is best? Can uncemented or compressive osseointegration stems ingrow in the face of chemotherapy or radiation? Do current medical therapies alter ingrowth, making cement a better option? Hear a panel of experts review these concepts in the case base discussion and see if you agree. In this 1 hour session, panelists will be presented a variety of cases that require intramedullary fixation and endoprosthetic reconstruction in the setting of primary bone tumors, metastatic disease, and failed endoprosthesis.
